WHAT DOES 1point5 MEAN?

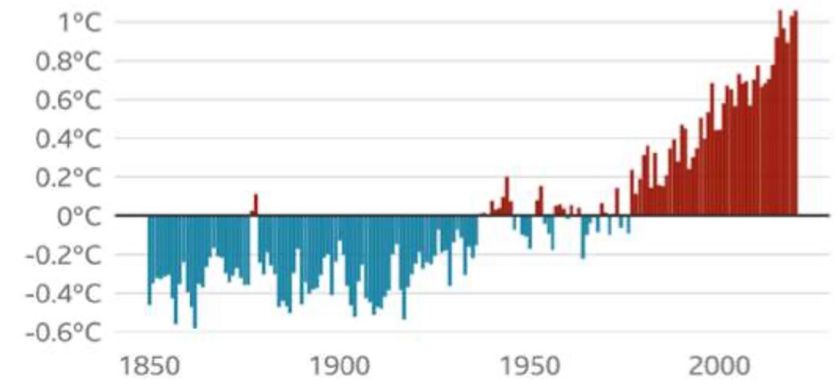

1.5 °C = 1point5

1.5°C is the target limit set out in the Paris Agreement. At COP 26 2021 it was agreed that urgent action is needed.

The wood industry (That's all of us) has the potential to contribute to the achievement of that objective

The world is getting warmer

Annual mean land and ocean temperature above or below average, 1850 to 2020

INNOVATION

THE RACE IS ON

More from less – x-ray scanning, log fingerprint leading to increased yield

Higher capacity – faster speeds

AI/Machine vision/smart control reduction of service and down time

Robotics and automation, 24/7 operating with less employees

Dramatically increased safety and reduction of environmental effects such as noise reduction

Move from manual labour to highly refined process environment
